

PackBot® The man-transportable, multi-mission robot

Modular, adaptable and expandable, the PackBot can perform bomb disposal, surveillance and reconnaissance, CBRNE/ HazMat detection and mapping. Quickly configured based on mission needs, PackBot climbs and descends stairs and navigates narrow passages with sure footed efficiency. PackBot relays real-time video, audio, and sensor data while the operator remains at a safer stand-off distance. More than 4,000 PackBot robots have been delivered worldwide.

The battle-tested PackBot, deployable in less than two minutes, can reach speeds of up to 5.8 mph, overcome obstacles and debris and support numerous disruptors and a broad array of sensors that deliver real-time intelligence. PackBot climbs slopes and stairs up to 45 degrees, is submersible in three feet of water and is operational in all-weather environments.
